

Quick and practical unloading

Unload viscous liquids easily with the HVS Quattro system, designed for **high-volume applications** with multiple pallet-stored drums.

Our **revolutionary articulated arm** allows easy drum switching and achieves up to **99% product removal**, reducing production costs.

Typical applications

» **Fruits & Vegetables** - tomato paste (concentrated), fruit pulp or base, sauce concentrate.

» **Syrups** - glucose syrup, maltose syrup, corn syrup, oat syrup, high-fructose corn syrup (HFCS).

» **Other food products** - caramel, peanut butter, almond paste, mayonnaise, nougat paste, chocolate.

Features

✓ **Efficient Drum Exchange**
Unload 4 drums stored on a pallet conveniently with easy drum exchange using the included articulated arm.

✓ **99% product extraction**
Product savings thanks to the applied scraping lid.

✓ **Swift Unloading**
Up to 400 liters per minute, depending on liquid properties and discharge pressure.

✓ **High process safety and time-saving benefits**
Brought by the control system.
